UNITED STATES DISTRICT COURT WESTERN DISTRICT OF NEW YORK

DOUGLAS J. HORN and CINDY HARP-HORN,

Plaintiffs,

-against-

Civil Action No. 15-cv-701 FPG/MJR

MEDICAL MARIJUANA, INC., DIXIE ELIXIRS AND EDIBLES, RED DICE HOLDINGS, LLC and DIXIE BOTANICALS,

Defendants.

805 Third Avenue New York, New York

December 12, 2017 10:06 A.M.

EXAMINATION BEFORE TRIAL OF DR. CINDY ORSER, an Expert Witness appearing on behalf of the Defendants herein, taken pursuant to Notice, and held at the above time and place before Terri Fudens, a Stenotype Reporter and Notary Public of the State of New York.

61 1 CINDY ORSER 2 the article. It's the second page of the exhibit, 3 but it's page 9 of the article under the heading 4 the major plant Cannabinoids, do you see that? 5 Α Yes. 6 And the sentence says 7 tetrahydrocannabinol, otherwise known as THC. should say THC is in parentheses, is a powerful 8 9 psychoactive agent, analgesic, muscle relaxant, 10 antispasmodic, neuroprotective antioxidant that 11 delivers 20 times the anti-inflammatory power of 12 aspirin and twice the power of Hydrocortisone. 13 Do you see that paragraph? 14 A Yes. 15 Q THC is a wonder drug; isn't it? 16 Objection as to MR. SHEPS: 17 form. 18 Q Can you answer the question? 19 It's pretty amazing. A 20 0 Did you ever describe marijuana as a 21 wonder drug? 22 Α No. 23 Are you an advocate of keeping THC in formulated cannabis products? 24

Α

25

Yes.

	62
1	CINDY ORSER
2	Q Why?
3	A Well, to the best of our knowledge,
4	THC is a key contributor to the effectiveness of
5	cannabis. So removing THC from cannabis per se
6	wouldn't make sense.
7	Q Is it fair to say that a product, and
8	I mean a formulated product, we're talking about a
9	formulated product in this case, would be
10	ineffective without any THC?
11	A No.
12	Q What then makes a product effective
13	without THC? What component of a formulated
14	Medical Marijuana product would make it effective
15	without THC?
16	A CBD.
17	MR. SHEPS: Objection.
18	Q Okay. CBD is not a Schedule 1 drug;
19	correct?
20	MR. SHEPS: Objection.
21	A I don't believe so.
22	Q Are you aware of the Schedule 1
23	substances?
24	A I think there's three.
25	Q There are three in your line of work,

```
97
 1
                         CINDY ORSER
 2
     allowed is what?
 3
                       MR. SHEPS: Objection.
            A
                  Less than .3 percent.
                  Where is that standard from?
 5
 6
                  Before 2014, I'm not sure.
 7
                  Less than .3 percent only came to be
 8
     a requirement post 2014?
 9
                       MR. SHEPS: Objection.
10
            Α
                  I'm associating it with the Farm
11
     Bill, but that might not be accurate.
12
                  Do you know the original source of
     that .3 threshold that you mentioned?
13
14
                  I don't.
15
                  What does that .3 threshold apply to
16
     exactly, levels of what in what?
17
                  .3 percent of THC.
            A
18
                  In what?
            0
19
                  In the raw -- the raw plant, the
20
     extracted plant. Whatever the hemp product is.
21
            Q
                  Well, is it the raw hemp plant, or is
22
     it some other product?
23
                  Well, people aren't going to import
24
     raw hemp. They're going to be importing extract.
25
            Q
                  Well, didn't this paragraph suggest
```

153 CINDY ORSER 1 so I don't really know if they're related. 2 So this product that -- this was one 3 of the things that -- these four pages were what you reviewed as a basis for your opinions in your 5 report; correct? 6 7 A Yes. Who provided you these? 8 It was in the Messner Reeves 9 A 10 documents. These are not specific as to a lot of 11 Q the product? 12 13 Α Correct. So as I think you just stated, these 14 do not correspond to the product that Mr. Horn 15 says that he took between October 1 and October 9, 16 2012; right? 17 18 Correct. Would it have been useful to you to 19 get the Certificates of Analysis that did apply to 20 21 that particular product? Yes. 22 A Did you ask for those particular 23 Certificates of Analysis? 24

25

A

Apparently they don't exist.

157

1 CINDY ORSER 2 Analysis in front of you were a representative --3 were as to a representative sample of that which was on the market on October 1, 2012? 5 MR. SHEPS: Objection. 6 MR. BORON: Objection as to 7 form. 8 I don't know. Α 9 So we don't even know if what was 10 tested here on these Certificates of Analysis was 11 even a representative sample; correct? 12 Α Correct. 13 MR. BORON: Objection as to 14 form. 15 MR. SHEPS: Objection. I guess the question is then why do 16 Q 17 you think these would be useful in determining the 18 THC content of the Dixie Elixir product at issue 19 here? 20 A I found this relevant because it demonstrates that Dixie was complying with the 21 22 requirements in the State of Colorado, that their 23 products are below the .3 percent THC. 24 That .3 percent is a Colorado 25 threshold?

```
158
                         CINDY ORSER
1
                  It's Colorado, but it's also the Farm
2
            Α
    Bill; right? But it is Colorado.
3
                  Back in 2012, the Farm Bill didn't
4

5
    apply; right?
                  Right.
 6
            A
                  So back in 2012, was .3 percent a
 7
8
     state legal limit for THC in Colorado?
                       MR. SHEPS: Objection.
9
                  That was my assumption.
10
                  We had to get the .3 percent from
11
                 It's not your testimony that it came
12
     somewhere.
     from the Controlled Substances Act; right?
13
                       MR. BORON: Objection as to
14
                  form.
15
16
                       MR. SHEPS: Objection.
                  I can't clarify that without looking
17
            A
     at the document.
18
                  To your knowledge, in 2012, say in
19
     the month of October of 2012, there was no maximum
20
     legal limit for THC in the State of New York;
21
     correct?
22
                       MR. SHEPS: Objection.
23
24
            A
                  I don't know.
                  Do you have an idea of whether -- if
25
```

159 1 CINDY ORSER 2 the reason for you not having the specific Certificates of Analysis had anything to do with 3 CannLabs' closure as a business? 5 MR. BORON: Objection to form. 6 I can't say. 7 As you sit here today, you don't know where CannLabs records would be held? 9 I don't know. Α 10 Do you think that Jennifer Murray would be able to tell me? 11 12 MR. BORON: Objection to the 13 form. 14 I don't know. 15 Do you have any reason to believe 16 with your testimony as to the relevance of this that this can be relied upon as an accurate 17 18 measure of THC in the product of October 1, 2012? 19 MR. BORON: Objection as to 20 form. 21 MR. SHEPS: Objection. 22 A I can't really say that either. 23 Okay. What are batch records as

So a batch record would be for

compared to Certificate of Analysis?

Α

24

25

160

- 1 CINDY ORSER
- 2 whatever the batch size is, whatever that unit is.
- 3 So batch is -- usually the cured flower is a
- 4 batch, or a bulk extraction is a batch. This is a
- 5 finished product.
- 6 Q Would there have been batch records
- 7 with respect to both the product that was tested
- 8 on October 16 and the one that was tested back on
- 9 October 1, 2012?
- 10 A That's a question for CannLabs and
- 11 Dixie. I don't know the answer.
- 12 Q Is that something that you would have
- 13 liked to have seen for this report?
- 14 A Yes.
- 15 Q Did you ask them for that?
- MR. BORON: Objection as to
- 17 form.
- MR. SHEPS: Objection.
- 19 A I did not.
- 20 Q To clarify, the batch records have to
- 21 do with the quantity of the sample that's provided
- 22 to make these Certificates of Analysis; is that a
- 23 proper statement?
- 24 A It's just upstream of a finished
- 25 product. So, you know, if you're Stouffer and

161

- 1 CINDY ORSER
- 2 you're manufacturing frozen lasagna, first you
- 3 have to cook the noodles, right, and then you have
- 4 to make the sauce. Then you have your final
- 5 product, which is the lasagna.
- 6 Q Gotcha. But batch records don't talk
- 7 about THC, right, to your knowledge?
- 8 MR. SHEPS: Objection.
- 9 A To my knowledge for them, I don't
- 10 know.
- 11 Q Did you at all find it unusual that
- 12 they gave you these Certificates of Analysis for a
- 13 different product?
- 14 A Well, yes.
- MR. BORON: Objection as to
- 16 form.
- 17 Q Okay. Looking at the actual face of
- 18 these documents, if you would, the first page of
- 19 Graham 13, Graham Exhibit 13, does show what you
- 20 stated as the maximum legal limit for THC --
- 21 excuse me, to .3 percent, 0.3 percent?
- 22 A Yes.
- 23 Q And next to it it says asterisk,
- 24 undetectable, and the asterisk seems to refer to
- 25 the asterisk explanation underneath. It says:

```
167
                         CINDY ORSER
1
     .05 and .04 are less than .3; correct?
                  Correct.
                  However, those numbers indicate some
     quantity of THC; right?
5
                  Detectable, even though right here
 6
     they say if it's below .1, it's not detectable,
7
     even though they're reporting it later.
8
                  When you say reporting it later, are
 9
            Q
     you talking about the .05 percent?
10
                 On the first page it says
11
     undetectable. It defines undetectable as below
12
13
     0.1, but yet on the last two pages, they're
     reporting a value of less than .1. The .04 and
14
15
     .05 percent.
                  So there is, at least with respect to
16
     the .05, a detectable amount of THC; correct?
17
                       MR. BORON: Objection as to
18
19
                  form.
                  It's being reported.
20
            Α
21
                  And it doesn't say undetectable
            Q
22
     there; right?
23
            A
                  Right.
                  So that is some quantity of THC in at
24
25
     least these Certificates of Analysis?
```

176 1 CINDY ORSER 2 industrial hemp, that this was the final 3 formulated product? MR. BORON: Objection to form. 5 MR. SHEPS: Objection. 6 It says 500 milligrams. It gives a sample size. I'm assuming it was the formulated 8 product. 9 Were you ever supplied the product from Dixie or Medical Marijuana or anybody? 10 11 A No. 12 Q Okay. Moving on to page 4 of your 13 report. 14 MR. SHEPS: Can we take a brief 15 break? 16 MR. BENJAMIN: Okay. 17 (At this time, a brief recess 18 was taken.) MR. SHEPS: I just want to 19 20 clarify something for the record. 21 Jeff, we had spoken just a moment ago 22 about the exhibit marked as Orser D 23 which was an internal chain of 24 custody with an order ID 281201415 25 dated October 29, 2012.

```
178
 1
                          CINDY ORSER
 2
     together; right?
 3
            Α
                  Yes.
                  What state are you talking about
 5
     there?
                  Colorado.
 7
                  And because that's the state where we
     believe the product was manufactured; correct?
 8
 9
            A
                  Correct.
                  You're saying that there's also a
10
     federal limit of the .3 percent. You see that
11
12
     there?
13
            A
                  Yes.
                  As you sit here today, you don't know
14
     the source of that maximum threshold for the THC
15
16
     quideline?
17
                  Not in 2012.
            Α
                  But in 2014, it was the Farm Bill?
18
19
            A
                  Yes.
20
                  And in that statement, implicit in
21
    that statement, because you haven't stated it
22
     specifically, you're applying that .3 percent
23
     threshold to the final formulated Dixie product at
24
    issue here?
25
            Α
                  Yes.
```

		189
	1	CINDY ORSER
	2	form. What numbers?
10	3	MR. BENJAMIN: I just stated
	4	them. 170 as opposed to 500 in the
	5	Certificates of Analysis.
	6	MR. BORON: 500 what?
	7	MR. BENJAMIN: 500 parts per
	8	million.
	9	THE WITNESS: .05.
1	0	MR. BENJAMIN: That's the .05
1	1	number.
1	2	Q Given that, given what evidence of
1	3	chain of custody are there or adulteration issues
1	4	is there with that kind of ratio?
1	5	MR. SHEPS: Objection.
1	6	MR. BORON: Objection as to
1	7	form.
1	8	A It's just the comparability. These
1	9	aren't C of As for the product Mr. Horn took.
2	0	We've never seen the product Mr. Horn took. The
2	1	product he took was never tested. This is another
2	2	version of the product at a later date. We don't
2	3	know if they changed, how they did anything.
2	4	There's a degree of uncertainty here.
2	5	Q You mentioned do you feel that the
1		

248 1 CINDY ORSER 2 Α Yes. 3 Now I submit to you that HempMeds PX 4 has been stated to be the company that was 5 offering the Dixie Botanicals brand. Pursuant to 6 a letter that the Horns actually received. 7 But looking simply at the information in that frequently asked question, that is 8 actually an FAQ with respect to workplace drug 9 10 screening; correct? 11 A Yes. 12 If I told you that the Dixie 0 Botanical FAQs have changed over the years to 13 include that, that language, would that indicate 14 to you that Dixie, and here HempMeds, was aware 15 that THC produced -- that THC was in their product 16 17 and produced positive test results? 18 MR. BORON: Objection to form. 19 MR. SHEPS: Objection. 20 I would interpret this that they knew Α there could be some THC, but they were making 21 22 efforts to have THC free products. 23 As of the date of the posting of 24 those FAQs; correct? 25 MR. BORON: Objection as to
